Robotter

Beskrivelse

Rodney Copperbottom er en kæk, ung robot, der styrer mod storbyen Robot City for at udleve sin drøm om at blive opfinder. Rodney finder ud af, at robotverdenen trues af den ambitiøse Ratchet, der vil fjerne alle reservedele og kun sælge opgraderinger.

Pædagogisk note

Fremragende animationsfilm som på alle måder er en hyldest til fantasi og innovation. Den unge fremadstormende hovedkarakter repræsenterer de klassiske dyder i en socialliberal verdensorden, men sættes på plads af de nye magthavere, der har tilranet sig magten i sine bestræbelser på profitmaksimering.

Dette til trods er her tale om en usædvanlig vellykket, sjov og højintensiv animationsfilm, der i den foreliggende originalversion er en gave til engelskundervisningen. Kapitelmærkningen markerer centrale steder i forløbet, og lægger op til diskussion. Filmens danske version var programsat i MsiB, og derfor ligger der et materiale til danskundervisningen fra 0. - 3. klasse på Filmcentralen.

Under 'Supplerende materialer' længere nede på posten ligger en generel vejledning til arbejdet med film 'Working with English Films'.

Supplerende er der et link til et undervisningsmateriale fra britiske "Film Education" - en parallel til Med Skolen i Biografen. Materialet henvender sig til elever fra 6. klasse.

Hvis man bruger filmen i engelskundervisningen før 6. klasse, vil der naturligt være aspekter af indholdet, eleverne nok ikke helt kan forstå eller tale om.

Filmens officielle trailer kan ses nederst på siden.
